⁽¹⁾Free Cash Flow ("FCF") defined as "Net cash flows from operating activities" less: (i) "Purchases of property and equipment" net of "Refunds and other receipts of purchases of property and equipment," and (ii) "Capitalized interest related to Regulatory authorizations". Free cash flow is not a measure determined in accordance with GAAP and should not be considered a substitute for "Operating income (loss)," "Net income (loss)," "Net cash flows from operating activities" or any other measure determined in accordance with GAAP. Since free cash flow includes investments in operating assets, we believe this non-GAAP liquidity measure is useful in addition to the most directly comparable GAAP measure "Net cash flows from operating activities."
